You are given the `firstname` and `lastname` of a person on two different lines. Your task is to read them and print the following:

```
Hello firstname lastname! You just delved into python.
```

**Function Description**

Complete the `print_full_name` function in the editor below.

`print_full_name` has the following parameters:

- string `first`: the first name
- string `last`: the last name

**Prints**

- string: 'Hello *firstname lastname*! You just delved into python' where *firstname* and *lastname* are replaced with *first* and *last*.

**Input Format**

The first line contains the first name, and the second line contains the last name.

**Constraints**

The length of the first and last names are each  $\leq 10$ .

**Sample Input 0**

```
Ross
```
